Who We Are

OMASPEC GLOBAL NIG LTD is an indigenous limited liability company fully registered in the corporate Affairs Commission(CAC) to render services which includes but not limited to procurement, field Support Services, Integrated Facility Management, Construction / Renovation Services, Manpower Supply Services, Procurement Supply and leasing Services.

We have OEM (Original Equipment Manufacturers) partnership with specific companies who manufacture equipments and tools used for effective running of the industries and organizations we do business with. Our passion for quality service and customer satisfaction driven target has created a heritage of inspired innovation, nurtured skilled craftsmen, who take pride in their work by meeting and exceeding customers requirements

Our Vision

Our Vision is to run a world class organisation where customers are partners, working together in achieving a set goal, with our focus in maximizing returns on investment using the besthands and brains in the industry.

Our Mission

Our team is driven to fulfilling our commitment to all our present and future customers. With our partnership with leading companies all over the world to get the best for effective running of the industries and organisations we service.

Our QHSE Policy

To ensure that all our operations are conducted in such a way that the safety, Health and security of all OMASPEC GLOBAL NIG LTD staff are paramount, motivating and guiding employees to comply to all OMASPEC GLOBAL NIG LTD HSE POLICY and other persons who may be affected by our operations are adequately safeguarded and proper regard is given to the protection of the environment and lives and property.

To define the performance standards for managing Health, Safety and Environment in all. Operations, which are to be assessed and continually improved by a performance monitoring program, audits both internal and external, monthly safety meetings are strictly enforced by the company n HSE management system is in place to reduce all other hazards and effects to a level that is as low as reasonably practicable (ALARP) and compliance with environmental legislation.

Use of HSE tools such as Job safety analysis(JSA), general work permit (GWP), Job hazard analysis (JHA), Incident Hazard Analysis (IHA), risk mitigation plan, tool box meetings, pep talk, safety stand up and stand down meetings are put in place in preventing incidence and accident from occurring during execution of projects and also the daily running of the Omaspec Global Nig. Ltd personnels both in the field and in the office.

Our Services

■ Integrated Facility Management

- Grass & shrubs cutting
- Plumbing maintenance
- Horticulture
- HVAC
- Painting
- Cleaning Services (Industrial and Residential)
- DSTV Maintenance
- Construction Services (Renovation/Refurbishment)
- Carpentry
- Waste Removal (Solid/Liquid)
- Supply of Portable Water

■ Field Support Services

- Instrumentation & Electrical
- Mechanical support
- Offshore and Onshore facility management
- Support Turn around Maintenance
- Capacity and Assets management
- Man Power Supply Services
- Turbine maintenance support
- Facility support services

■ Oil and Gas Engineering Services

■ Consultancy Services

■ Procurement Supply and Leasing Services

Integrated Facility Management

OMASPEC GLOBAL NIG. LTD provides Integrated facilities management (IFM) services to oil and gas companies in Nigeria with a wide range of specialized services offered that cut across Horticultural services, Industrial and residential cleaning services, waste removal services, DSTV services, industrial and residential Plumbing services, Water plant and Portable water provision services and a lot more. Modern equipments and tools are deployed in carrying out IFM services within the facilities we operate, OGNL personnel's deployed to work in facilities are well trained and skilled, they offer the very best in ensuring incident free operations on a daily basis

We currently execute long term integrated facility management services contract for major international oil and gas companies in Nigeria, our four main functions and ethics in IFM are

- Support people
- Establishing processes
- Facilities upkeep and improvement
- Technology interpretation and finally
- Putting it together for facilities management that ensures the comfort of people and the environment we live in

Grass And Shrubs Cutting

We are responsible for the grass cutting on Council owned land within the District and numerous areas of dedicated open space which we have adopted.

Our grounds maintenance service is contracted out to a private company who should ensure that the grass on these sites should not exceed 60mm in height before being cut. Grass cuttings are not removed from these sites, as the frequency should ensure that the grass is never left too long so as to cause it to look unsightly.

Horticulture

Horticultural science is the only plant science that incorporates both the science and aesthetics of plants. It is the science and art of producing edible fruits, vegetables, flowers, herbs, and ornamental plants, improving and commercializing them.

Production and consumption of high quality fruits and vegetables allows us to maintain a healthy, balanced daily diet. Flowers and ornamental plants enrich our homes and communities, and contribute to our sense of well-being. Horticulture impacts our lives on a daily basis by providing nutritious fruits and vegetables, offering visual enjoyment, and promoting recreational activities.

Old Unit

New Unit

HVAC

HVAC stands for heating, ventilation, and air conditioning. It refers to the systems that regulate and move heated and cooled air throughout residential and commercial buildings, from homes to offices to indoor stadiums. Although there are many options when it comes to HVAC systems, they all work similarly, taking in fresh air and using a mechanical ventilation system to heat or cool it to a desired temperature.

HVAC units also can control humidity levels and improve air quality through air cleaners that capture bacteria, spores, and virus-sized particles. The HVAC technician who comes to your home for a pre-installation evaluation will help you determine which system and options are best for you and your home.

Painting

Our painting services range from color consultations to assist you in picking paint colors for your home to full design projects to take you from your dreams to reality. Whether you need the cost of painting a house or the price of fine coat paint in Nigeria, our prices are highly competitive. We offer other Wall Decoration solutions like wall papering, cladding and screeding .

We would like to assist you with all of your paint and sundry needs for your next project. We will supply you with interior and exterior paints, stains, tools and instructions you need to take you from the beginning to the completion of your task. We take pride in providing quality service along with quality products for our customers.

Before

After

Construction Services (Renovation/Refurbishment)

The term renovation refers to the process of returning something to a good state of repair. In the construction industry, renovation refers to the process of improving or modernising an old, damaged or defective building. This is as opposed to retrofitting which is providing something with a component or feature not originally fitted, or refurbishment which is a process of improvement by cleaning, decorating, or re-equipping.

Carpentry

we provide top class facilities maintenance services, Home Automation, and Renovation services, with optimum customer experience being our benchmark, as well allowing corporate bodies focus on their primary business while we handle their facilities needs.

Waste Removal (Solid/Liquid)

Solid and Liquid Waste Management (SLWM) is one of the key components of Omaspec Global Nig. Ltd, launched with the objective of bringing improvement in cleanliness, hygiene and the general quality of life in rural areas.

solid waste include wastes from kitchens, gardens, cattle sheds, agriculture, and materials such as metal, paper, plastic, cloth, and so on. They are organic and inorganic materials with no remaining economic value to the owner produced by homes, commercial and industrial establishments.

Supply of Portable Water

Treatment, and conveyance equipment used to provide water used or intended to be used for human consumption, including drinking, washing, bathing, the preparation of food, or laundering. This definition does not include any internal piping or plumbing, except for mechanical systems, such as pump stations and storage tanks or lavatories, that are located inside a building or structure and that are integral to the operation of a potable water system. This definition also does not include a potable water supply that is subject to regulation as a public water supply.

Plumbing Maintenance

Omaspec Global Nig. Ltd. Offers high quality Plumbing Services to oil and gas facility on a long term call out / permanent basis. We maintain and handle replacement plumbing tools and equipments used regularly in the oil and gas facilities, service. If need be, repairs, alteration, or modification of the pipes, fixtures, and other apparatus used for bringing the water supply into a building and removing liquid and water-carried wastes from a building are utilized. Our Plumbing services also includes the installation and connection of gas piping with modern technology system been deployed

DSTV Maintenance

Omaspec Global Nig. Ltd. are first hand for Purchase, delivery, installation and Maintenance for all DSTV related issues. Long term maintenance contract involving DSTV maintenance in oil and gas accommodation buildings are in place with major IK We use our modern technology in handling, installing and maintaining ^ds for our clients and partners.

Field Support Services

OMASPEC GLOBAL NIGERIA LIMITED provide Field Support Services to onshore, offshore, swamp and deep sea oil and gas installation on a regular and call out basics.

Instrumentation & Electrical Services

OMASPEC GLOBAL NIGERIA LIMITED provide services that involves calibration of switches, meters and support services in commissioning and turn around maintenance, preventive and corrective maintenance on motor control centers, Human machine interface and field equipments.

Mechanical Support

We provide support to mechanical appliances or devices used in the oil and gas facility, which includes but not limited to rotating equipments (Generators, both diesel and gas fired, pumps, cooler fans, air compressors and gas driven turbines. Carry out preventive and corrective maintenance on rotating equipments (2200Hrs/4400hrs/8800Hrs) Support in house mechanical department in carrying out engine change out (Solar turbine trained mechanical technicians) pump revamp and commissioning /installation support Keep the stock of spare parts and consumables at the appropriate level by verifying the stock levels and having them available during preventive and corrective maintenance

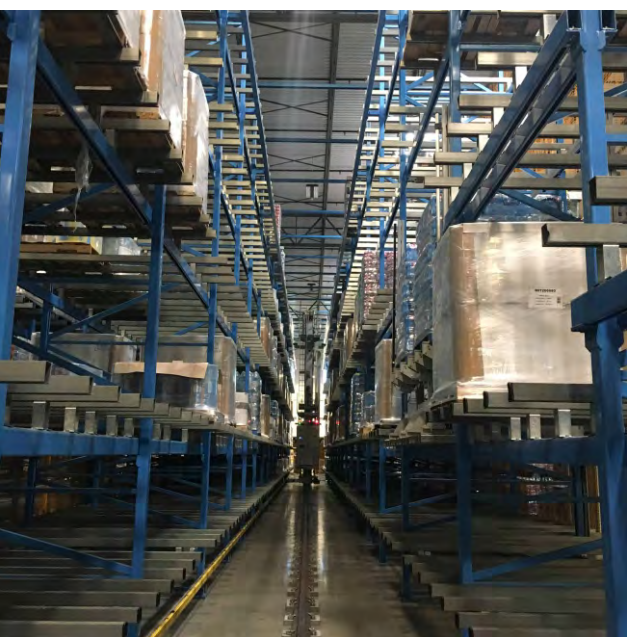

Cleaning Services (Residential Services)

Omaspec Global Nig. Ltd. carry out high-pressure cleaning services in oil and gas installations, we use a system that includes a high pressure pump, hoses, pipes, nozzles, controls and various accessories to create the necessary cleaning volume and velocity needed in cleaning oils and equipments like coolers, radiators and generator system. We use various types of high-pressure cleaning systems to suit every particular cleaning job that involves applying chemicals and mineral water for cleaning purposes.

High-pressure cleaning techniques usually involve the use of high pressure equipments between 5,000 to 10,000 psi (34 to 70 MPa) to remove grime, loose paint, mud, debris, mold, dust and other types of stubborn dirt on the surfaces of tanks, enclosed spaces, containers, engine area, pipes, cooler fans and many more items in the process and non process paint.

Pressure rating measured in pounds per square inch (psi), Pascal or bar. The pressure contributes to the impact that will break the bond of the dirt to the surface being cleaned.

The flow rate from the pump in liters or gallons per minute. The volume supplied by the pressure pump also helps to determine the cleaning system's effectiveness and speed in removing and rinsing the dirt away.

Asset Management

Omaspec Global Nig. Ltd. Handle the asset management system of its clients. We manage all assets across the business. These assets can be tangible or intangible. They can include personnel, buildings, software and hardware, inventory, monetary assets, and anything vital to the business's day-to-day running.

Procurement Supply and Leasing Services

Another important aspect of our service line is the procurement and supply of oil and gas equipments, machinery, instruments, tools, spares, materials, chemicals, other consumable used by our partners in running their facility. te support the manufacturing, power, chemical and construction sectors of the Nigerian economy in providing tools and equipment needed under procurement support.

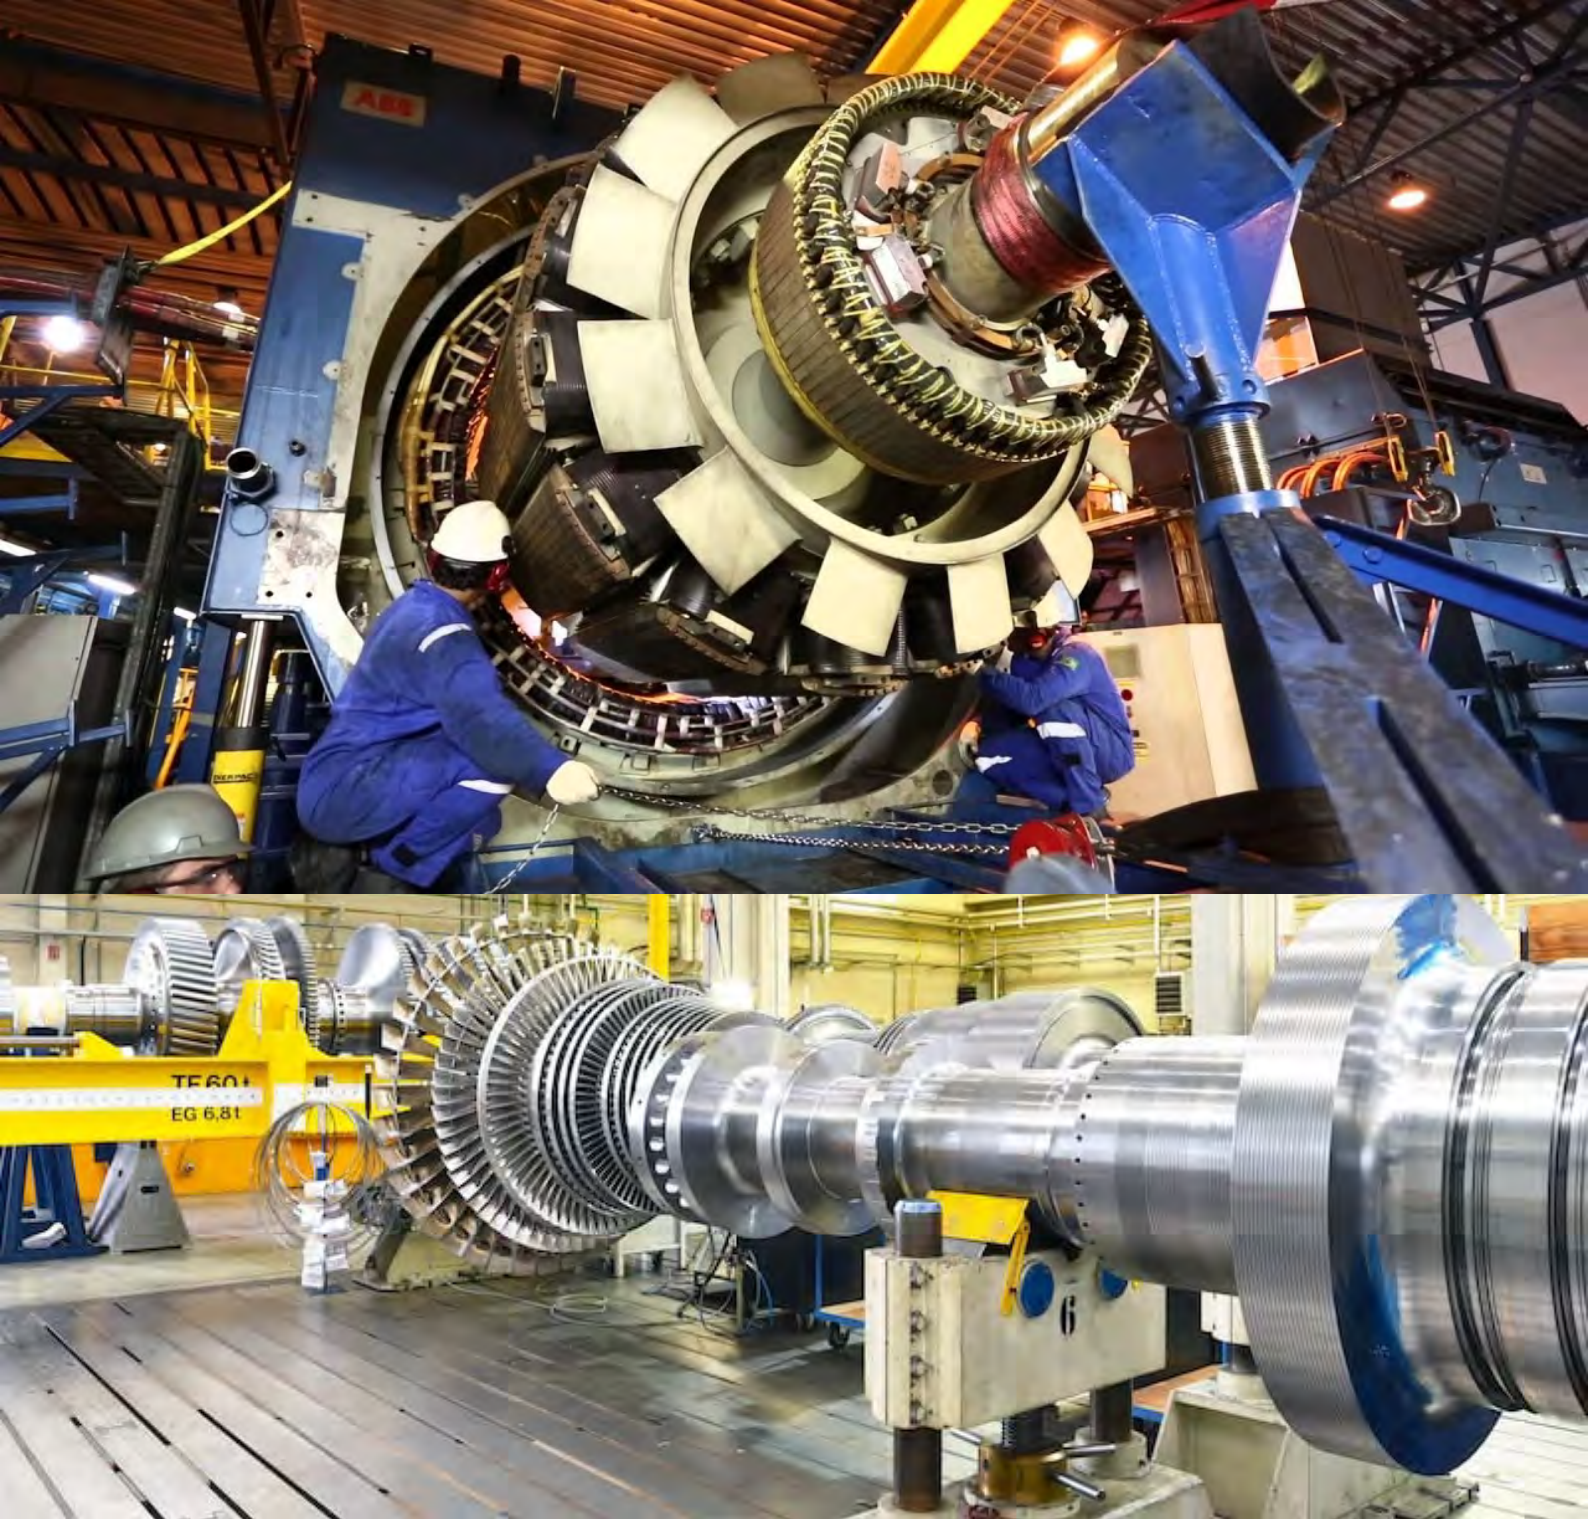

Our organization also provide leasing of equipments to oils and gas facilities on a long and short time basics.

We provide services to both local and multinational organizations in procurement and leasing services required

Oil and Gas Engineering Services

We work with our partners to streamline oil and gas servicing that don't just deliver on perfection but also delivers on time. Our robust technology, knowledge-based approach and dedication to quality and safety allow us to provide innovative solutions to every part of the oil and gas industry by providing the necessary man power and technology support required.

Turbine Maintainance

Omaspec Global Nig. Ltd. Carry out Some of the specific turbine repairs and support maintenance services of gas fired turbines, these services are needed for preventative and corrective maintenance, engine change out and upgrade services needed. te have access to trained mechanical technicians that offer the services when needed.

Turnaround Maintenance

Omaspec global Nig. Ltd. provides dedicated support for Turnaround maintenance. We provide man power and support for scheduled turn around maintenance where a facility/plant is shut down for a predetermined time to carry out operational inspections, maintenance, repairs, replacements of parts. support personnel are also deployed for equipment upgrade .

Consultancy Services

Omaspec Global Nig provide consultancy services in all the major areas of specialty including man power provision for dedicated craft. Have stationed personnel providing consultancy services for multinational companies on a long / short term basics.

On-shore Facility Management

Omaspec Global Nig Ltd carry out on-shore facility management for oil and gas companies. This is a professional management discipline focused on the efficient and effective delivery of logistics and other support services, as defined by the International Organization for Standardization (ISO).

Off-shore Facility Management

Omaspec Global Nig. Ltd is able to provide a complete and comprehensive range of solutions for clients wishing to improve their facilities' operational efficiency or increase the lifespan of their current fleet.

From surveys, FEED studies, service, maintenance, repairs, replacements and upgrades, to refurbishment, installation, commissioning, decommissioning, shutdowns and turnarounds, we support our clients with all their requirements on site, including ongoing maintenance contracts.

Manpower Supply Services

OMASPEC GLOBAL NIG. LTD provides Recruitment and Manpower Supply Services for our clients in the Oil and Gas Industry. OMASPEC provides Consultant/Manpower Supply services to our clients in the Oil and Gas industry. We supply Consultants to the Projects and Operations of our Clients. We also perform Outsourcing Services like Project Recruitment Exercise and Workforce Management in Oil and Gas Industry in Nigeria.

Project Recruitment Campaigns OMASPEC organizes and executes Recruitment Exercise for our Clients for both Foreign and National Recruit. The Recruitment Exercise includes: Candidate Attraction and Advertising, Short Listing, Interview Coordination and logistics, help with making the job Offer and Contract Signing.

The Recruitment Exercise is organized as a project with clearly defined timelines, KPI's and deliverables.

Manpower and Consultants Supply OMASPEC supplies low, mid to high level technical, operational and managerial professionals to companies in the International Oil and Gas Industry located in Nigeria . The professionals are seconded to the Client's operations, either in the office or at the work location.

OMASPEC takes care of all activities related to the recruitment and employment of the seconded personnel. OMASPEC takes care of: Recruitment & Selection, Mobilization, Visas & Work permits Payroll, Insurances, Taxes and all other services related to manpower provision both for skilled, semi skilled and expatriate personnels needed. We have presently recruiters license required to hire both national and expatriate needed for short and long term requirement.

OEM Partnership

HANNY REELS- THE ONLY REEL YOU ONLY NEED

Several distinct design and construction advantages contribute to the superior “buy it once” quality of Hannay Reels. Once you experience the hose and cable reels, you’ll see why there are more than two million of them hard at work around the world today.

These exclusive features produce longterm strength, reliability, and versatility to your hose reel or cable reel;

- Heavy-duty design and construction
- Dual bearing and dual frame support - standard on all models
- Heavy-guage steel frame
- Sealed axle bearings for smoother operations and longer life
- One-piece axle hub assembly
- Compact design to conserve space
- Custom construction to meet your requirements
- All products made in the USA

Maritime

- Drydock, workboat, shipyards
- Lubricating liquids • Pneumatic tools
- Firefighting • Food processing
- Gas welding • Heavy rope storage
- Offshore crude unloading, refueling
- Electric cable for tools and boat servicing
- Washdown, steam cleaning, power wash

Fire/Rescue

- Booster hose
- HazMat situations
- Vehicular extrications • Hydraulic tools
- Electric cables for lights and tools
- Breathing and utility air applications
- Dual agent/foam
- Large diameter hose

Industrial

- Hydraulic/pneumatic tools and machinery
- Washdown • Potable water
- Food processing • Gas welding
- In-plant firefighting • Vacuum/suction
- Pharmaceutical and cosmetics
- Fuel, lubrication, chemical transfer
- Electric cable for lights, tools, machinery

Construction

- Service/lube hose for heavy off-road equipment
- In-house maintenance and servicing – air, water, lubricating fluids, fuel, and more
- Gas welding and cutting operations
- Hydraulic tools
- Electric cable for arc welding, remote lighting, generators, and more

Grounds Maintenance

- Pesticides, herbicides
- Watering and fertilizing
- Electric cable for power tools – clipping, edging, trimming
- Pressure washing, steam cleaning
- Washdown
- Lawn care

Communications

- Portable and stationary electric cable for studio and mobile units
- Video inspection
- Sound/light rigging (rope and cable)
- HazMat fire emergency locations

OEM Partnership

HIDRACAR S.A- QUALITY IN THE DESIGN OF EVERY DETAIL

A leader in the field of pulsation dampers, oleo-pneumatic accumulators, shock absorbers, oleo-hydraulic starters for Diesel engines and oleo-pneumatic suspensions for tankers and agricultural trailers.

Our experience and knowledge is fully available to our customers, whose trust in our products has made the HIDRACAR brand present throughout the world.

Design, manufacturing, marketing and after sales of

- Hydro Pneumatic Accumulators
- Pulsation Dampers
- Dynamometers.
- Shock Absorbers
- Oleo-hydraulic Starters
- And Suspension Cylinders.

OEM Partnership

HIDRACAR S.A - INDUSTRY APPLICATION

Pulsation dampers

To stabilize the flow and pressure in circuits with volumetric pump
Allows pump to work without shock, increasing its life and the life of the filter, flowmeters and other accessories
Gives more accuracy to pressure gauges and flowmeters
Prevents leakage from pipe connections created by pressure peaks

In-Line Pulsation Damper

- Food, pharmaceutical processes
- CIP (clean in place) processes.
- no limitation on the nitrogen gas charging pressure
- beverages processes

Oleo-Pneumatic Accumulators

- Energy storage, impact absorption,
- dampening of water hammer effect,
- transference of pressure between two different fluids,
- keeping the pressure in leaking circuits,
- to compensate the variations in the volume of a liquid due
- to its thermal dilatation, machine tools

Oleo-Pneumatic Shock Absorber

- decelerate masses in reciprocating, linear, circular and other movements.
- They also work as shock absorbers of weights in free fall
- as suspension of vehicles and wagons,
- for the tightening of chains,
- conveyor belts, rollers.

Suspension Cylinders

- truck and tractor towed load trailers,
- tanker trailers for the transport of liquids and
- slurries and fumigation tank trailers.

Hydrostatic Dynamometers

- Direct control of crane suspended loads,
- machining of shafts
- effort measurement in electric lines,
- ground vehicle and boat traction,
- conveyor belts, traction tests
- electronic output with a piezoelectric transducer that provides an remote output

OEM Partnership

ATEXXO MANUFACTURING - ATEX/IECx Explosion Proof product design

Produces explosion safe variants of a wide range of products. Our main focus is however on the production of explosion safe tablets, smartphones and air conditioners. We are also able to produce and certify industrial products of your choice. our unique product can be supplied and delivered worldwide to all oil and gas majors, petrochemicals and pharmaceutical companies and other companies that deal with explosion risk.

Unique ATEX and IECEx capabilities

- ATEX and IECEx approved
- Fast World Wide Delivery
- User-friendly and easy installation
- Latest tehnological developments
- Smartphones, tablets and air conditioners
- Suitable for Zone 1, zone 2, Zone 21 and Zone 22

OEM Partnership

ATEXXO MANUFACTURING - INDUSTRY APPLICATION

 ATEX Zone 2, Explosion Proof Split Unit Air Conditioners • Technical Cooling / Heating • Chemical plants and ships • Offshore oil platforms • Battery rooms • Storage of hazardous goods • Analyzer cabinets		 Explosion Proof ATEX Zone 2 iPhone 13 (Pro) • Petro (chemical) plants • Offshore environments • Intrinsically safe camera • Storage of hazardous goods • Harsh environments	
 Explosion Proof ATEX Zone 2 iPad Mini 6 • Petro (chemical) plants • Offshore environments • Intrinsically safe camera • Storage of hazardous goods • Harsh environments		 Explosion Proof ATEX Zone 2 iPad Pro • Petro (chemical) plants • Offshore environments • Intrinsically safe camera • Storage of hazardous goods • Harsh environments
